EDUCATION

10.2025 - Now	M.Sc. Automotive Software Engineering <i>Technische Universität Chemnitz</i>	Chemnitz, Germany
	• Current Grade: 1.05	
08.2015 - 05.2019	B.Sc. Electrical Engineering <i>Purdue University</i>	West Lafayette, USA

EXPERIENCE

01.2022 - 12.2023	Project Management Co-officer <i>Thate Pan Hub - Innovation Department</i>	Yangon, Myanmar
	• Delivered introductory computer science courses to over 250 students across three schools in Hpa-an, Karen State, increasing early exposure to STEM education. • Led Training of Trainers (TOT) workshops for volunteer teachers in coordination with the academic team, enhancing local teaching capacity. • Managed end-to-end production of lesson plans, lecture slides, lecture videos and exercises used for the courses.	
02.2020 - 12.2021	Junior Electrical Engineer <i>ACM Company Ltd</i>	Yangon, Myanmar
	• Designed electrical panels and circuit schematics for installations at projects across commercial, industrial, and construction sites. • Coordinated with clients, and conducted site inspections to monitor project progress and proactively resolve technical issues. • Conducted internal training sessions on electrical components used in projects, improving cross-functional understanding among project teams.	
08.2018 - 05.2019	Undergraduate Teaching Assistant <i>Purdue University - Electronic Measurement Techniques Lab</i>	West Lafayette, USA
	• Supported over 50 students during the academic year by providing both hands-on and theoretical assistance during lab sessions and office hours. • Performed routine maintenance, and managed inventory of lab equipment and electronic components at the lab storage.	
08.2016 - 05.2017	Controls Engineer <i>EPICS Program - Purdue Orbital</i>	West Lafayette, USA
	• Designed and implemented a PID control system for DC worm gear motor and linear actuator to automate launch platform orientation according to user input. • Developed and laid out PCB designs for the power supply and the control system modules using EaglePCB.	

PROJECTS

- 04.2026 - 07.2026 **RaspNet Protocol Implementation**
Embedded Software Lab Technische Universität Chemnitz
- Implemented a 4-layer network protocol stack in C for ATmega microcontrollers, enabling reliable communication across a logical token-ring network.
 - Built CRC32-based error detection, packet framing, and a state-machine-driven receiver to ensure data integrity between adjacent nodes.
 - Designed addressing, routing, and acknowledgment/retry mechanisms supporting both reliable and best-effort message delivery.
- 01.2019 - 05.2019 **Digital Wave Synthesizer**
Senior Design Project for Graduation Purdue University
- Designed the ADSR envelope and class AB amplifier circuits for audio output.
 - Developed the charging circuit for the Li-Po battery and DC-DC buck converters for the power supply subsystem.
 - Created the PCB layouts for the power supply and sound output subsystems using EaglePCB.
- 01.2018 - 05.2018 **Face-tracking Assistive Phone Mount**
Microprocessor Systems and Interfacing Purdue University
- Programmed the STM32 microcontroller to control the servo motors according to camera input, and to integrate with touchscreen interface for manual positioning.
 - Designed the PCB layout for the project, including the power supply circuit using EaglePCB.

SKILLS

Administrative: Microsoft Office, Google Suite, Slack, LaTeX

Engineering: AutoCAD, EaglePCB, LTspice, Linux, MATLAB

Programming: C, C++, Python, JavaScript, TypeScript, Git

Language: English (C1), German (A2), Japanese (N2), Burmese (Native)

LEADERSHIP

- 08.2017 - 05.2019 **Chair of Multicultural Relations Committee**
Electrical and Computer Engineering Student Society Purdue University
- 08.2018 - 05.2019 **Co-founder and Vice President**
Myanmar Students Association Purdue University

HONORS

- 08.2015 - 05.2019 **Myanmar Presidential Scholarship**
Government of the Republic of the Union of Myanmar
- Awarded for B.Sc. Electrical Engineering program at Purdue University.

Chemnitz, 06.08.2026

Moe Ye Htet
